

About this course

Hello, Welcome to the Pre-Joining Program (PJP)

This PJP course contains two parts –

- PJP Foundation
- PJP Core

The **PJP Foundation** is an optional learning path that will take you through few videos on Foundation, Motivation and IT Trends.

The **PJP Core** is a mandatory learning path that is designed to increase your programming skills.

The main components of the **PJP Core** course are –

- **Tech Modules / Capsules**
- **Code Completion Tracker**
- **Discussion Forum**

Tech Modules / Capsules:

“Tech Modules” are the dark blue shaded rectangular links on the left-side frame in PBLApp. Each Tech Module contains a Mini-Project and related Learning material. You are expected to read the learning material and complete the hands-on assignments.

Code Completion Tracker:

You are expected to do all the hands-on assignments and the mini-projects locally on your computer. Please read the “Environment Setup” document to know how to setup the software required for completing your hands-on assignments and the mini-projects. After completing the hands-on tasks, you are expected to upload the code using the “Code Completion Tracker” link.

Discussion Forum:

“Discussion Forum” should be used to post your technical queries OR for responding to queries posted by your co-learners. The queries will also be responded by remote mentors who will keep monitoring the discussion forum.

Self-assessment Link:

The “Self-Assessment” link will be opened up by mid-March which will provide you an opportunity to assess your own learning. The self-assessment will include an MCQ (Multiple-Choice Questions) and a Programming part.

Wishing you a Happy & Effective Learning time!!
